

AUGMENT HIGHLY APPRECIATED ASSETS

THE PHILANTHROPIC CAPITAL MARKET

Holders of highly appreciated assets often enter into various mechanisms, or form various legal entities, to accomplish their philanthropic, estate, or most likely, capital gains tax aversion objectives. Unfortunately, while they do succeed avoiding capital gains taxes, traditional instruments formed to facilitate sales of highly appreciated assets such as charitable trusts, family or community foundations, donor advised funds or other irrevocable trusts, have proven to be inefficient, inflexible, and irremediable. Altruism aside, owners looking to harvest their assets within a capital gains tax free structure haven't had much of a choice other than these ineffective vehicles: Until now.

Augmentic Asset Advisors Inc., a non-profit 501c3 corporation, facilitates sales of highly appreciated assets that averts erosion from capital gains taxes *as well as* originates and deploys fresh working capital into new or existing business entities. Established in 2103, we are uniquely qualified to facilitate efficient, productive and profitable transactions that preserve 100% of principal, preclude capital gains tax, and provide capital and liquidity.

Our proprietary business model amalgamates expertise in specialized professions of philanthropy, estate, tax, investment and commercial banking, all performing together within a highly regulated environment. Proficient in the sum of these parts, we have created a philanthropic capital market that augments client IRR and net worth.

Augmentic Asset Advisors accepts gifts and facilitates sales of various types of assets such as: Listed, unlisted, and restricted securities, real estate, partnership and business interests, art, or personal property.
